

## DVBLink v5 is released!

*New features include TV streaming on the go, new supported platforms and convenient web interface.*

30<sup>th</sup> May 2014. For several years, the Dutch company DVBlogic has been offering a complete solution for live and recorded TV for Windows, Raspberry PI or NAS platforms. With the support for satellite (DVB-S/S2), Cable (DVB-C and QAM), terrestrial (DVB-T/T2 and ATSC) and IPTV reception DVBLink TV Server records user's favorite TV programs in original quality directly to a hard disk of the host system and streams live and recorded TV content within the home network and on the go. New version 5 adds a number of features, making watching TV content even more enjoyable.

### **New Features:**

- Support for Ubuntu desktop Linux
- Support for Western Digital EX2 and EX4 NAS products
- Support for video transcoding for live and recorded TV on Windows, Linux and NAS platforms
- Support for triple-standard (DVB-T/T2/C) tuners from PCTV and Technotrend on NAS platforms
- PayTV channels support with Technotrend CT2 4650CI tuner (DVB-T/T2/C) and DVBSky S960CI (DVB-S/S2) tuners on NAS platforms
- Grid like EPG interface for a web browser
- Streaming multiple channels from the same transponder for DVBLink TVSource
- Server streaming activity monitoring interface
- Social network integration to share your impressions about programs and/or recordings

The new version is now available for download from the DVBlogic site ([www.dvblogic.com](http://www.dvblogic.com)). For those upgrading from previous versions, a 50% discount is given.

**About DVBLogic:**

DVBLogic was founded in 2007 in Eindhoven (Netherlands). Its first DVBLink products have enabled full featured satellite and cable TV reception for Windows MediaCenter. In the following years the DVBLogic product portfolio has grown and now offers a complete set of live or recorded TV solutions for Windows, desktop Linux, Raspberry Pi and NAS platforms. With the support for Satellite (DVB-S/S2), Cable (DVB-C and QAM), Terrestrial (DVB-T/T2 and ATSC) and IPTV reception DVBLink records user's favourite TV programs in original quality directly to a hard disk of a computer or a NAS and distributes live and recorded TV content within a home network and on the go.

Since its foundation DVBLogic has introduced products for use with many manufacturers, including Synology, QNAP, Western Digital, NETGEAR, ASUSTOR, PCTV Systems, Technotrend and many others.
